- * DUAL BATTERY COMPARTMENT
- * HEATED HOLDING TANKS (Optional)
- * INSIDE ACCESS TO STORAGE IN FRONT OF TRUCK WHEEL WELLS
- * DIAMOND PLATE KNEE WALL ARMOR
- * LED LIGHTS INTERIOR & EXTERIOR

CAMPER SAFETY TIPS:

For your safety while driving, use mirrors that allow you to view past the camper to the rear on both sides. Trucks can be purchased with extended mirror options or you may purchase mirror extensions. Truck manufacturers state that you should not exceed the GVWR for the vehicle that carries your camper. The configuration of your truck will determine what size camper your vehicle can carry. A dual rear wheel truck is advisable for Arctic Fox campers. Adjustable air bags will help to level your vehicle, transfer rear axle weight forward for comfort and safety, and are recommended for all Arctic Fox applications. Some states allow passengers to ride in the camper, but it is not recommended as there are no seat belts available. When driving in any adverse weather condition it is always best to reduce your speed. The pickup should be outfitted with a durable rubber mat liner to reduce shifting while traveling. The mat will also protect the truck bed and camper from scratching while loading and unloading.

Use **TORKLIFT** frame mounted camper tie downs for greatest safety.

Truck Camper Magazine Review

Spending two weeks in the 850 gave us an unusual opportunity to experience a new brand and product.

For starters, the Wolf Creek 850 is right up our alley; hard-side, non-slide, fully self contained, and brimming with practical and weight saving design choices. In short, we love campers like this because they are everything we need for the kind of long-distance, go-anywhere truck camping we enjoy. Even more important, they show a willingness of manufacturers to embrace the increasing importance of lower weight truck campers and design new campers accordingly.

We really appreciated the generous holding tanks for a camper this size. Thirty gallons of fresh water? That's amazing...The gray and black tanks were also ample at nineteen gallons and twenty gallons respectively... When we turned the vent fan on, it surprised us with just how much air it pulled...

... they put a very tall bubble window in the bathroom that allowed me, at 6'3", to see almost completely around the camper... it was really fun to be able to look around and see what was going on outside the camper...

We were mixed on our impressions of the dinette. We liked how big it was, but wondered if it needed to be quite this wide. Northwood explained that it was wide to allow for an adult-sized sleeping area. It certainly was. The dinette was also comfortable and worked well during our two weeks in the camper. I appreciated the long cushion that allowed me to stretch out. We found an outlet under the dinette in the perfect place to plug in our laptops. Nice touch.

Kitchen storage and counter space were plentiful for a truck camper this size. We also liked the round sink and tall faucet. Having a large storage drawer under the cooktop instead of an oven was another practical cost and weight saving decision. As we get more experienced with cooking in a truck camper, we use camper ovens more and more. That said, we didn't use a camper oven at all except to store pots and pans until the past couple of years. Could we live without the oven? We sure could. Did we appreciate the additional storage of the drawer where the oven would have been? You bet.

The three cubic foot refrigerator was smaller than we're used to, but it fit our normal round of groceries with ease. What we lost in space we gained in a lighter weight refrigerator. We can't all ask the manufacturers to make their campers lighter without being

open to options like a smaller refrigerator. This is a compromise I could live with as we never found the space in the refrigerator to be lacking. Sure, it's nice to have separate freezer and refrigerator sections, but this was perfect for what we needed. On the driver's side overcab entry was a standard cabinet with an open storage spot just underneath it. We used this for overflow items and found it to be very useful and practical. It also saves a little more weight by not having a door. We really liked it.

We also appreciated the storage under the overcab step-up. We put our sneakers in there when we were wearing sandals, or vice versa.

As always, little things make the biggest differences. For example, the overcab reading lights in the Wolf Creek are outstanding. Unlike too many other overcab reading lights, they are not too bright or too hot.

Some overcab reading lights make you wonder when the men in black will arrive to ask you exactly where you were on October 18th, 1972, and what you were doing there. We also appreciated that these lights were easy to move. I liked them pointed away, to give a more indirect and ambient light. On the passenger's side of the overcab, the Wolf Creek had what I would call a night stand. The front of the night stand had an opening and storage area where I placed my sweatshirts and jeans. Just like at home, I put some reading material and my iPod Touch (alarm clock) on the nightstand.

When we were plugged in, I really appreciated the outlet that was also with the nightstand. Personally, I prefer this nightstand to the traditional overcab-nose storage. The driver's side of the overcab nose had the traditional storage cabinet and Angela was so jealous of my nightstand. Did I offer to switch sides? No way!

For someone looking for an aluminum framed, hard-side, non-slide truck camper that will work with some half-tons and nearly every three-quarter ton truck, the 2012 Wolf Creek 850 deserves to be on your short list. This is an impressive camper from a company that understands truck campers and cares deeply about quality control. Congratulations Northwood on your new Wolf Creek truck camper brand and an impressive first camper with the 2012 Wolf Creek 850.

*"Where Quality is
 Everyone's Responsibility"*

A Solid Foundation: Thick Basement Walls & Aluminum Trusses. Extra Strong Thick Wall Tubular Aluminum Floor Frame

Really Big holding tanks require a 'Really Big' floor structure...
That's The Wolf Creek Floor Structure!
 Thick wall aluminum basement floor joists support our holding tanks under the basement of every Wolf Creek Truck Camper.

Continuous One Piece Fiberglass Cabover / Bulkhead

No seams that can leak!

One Piece Laminate Walls

Our aluminum wall frames are constructed of .060" thick aluminum tubing and all joints are welded full width, not spot welded like much of the competition.

One Piece Continuous Fiberglass

The outer skin of our laminated wall is a single sheet of tough, corona treated fiberglass. Corona treating ensures the polyurethane is able to properly accept the hot melt adhesives. A single piece of fiberglass eliminates seams that can leak & it's stronger too.

Steel Bonderizers

We add steel bonderizer strips inside the wall at all mounting points. The bonderizers provide a steel anchor point for any fixtures that are mounted to the walls.

Solid Core Anchor Blocking

We also add solid core anchor blocking in the frame perimeter. The solid blocking provides a substantial anchor medium for securing screw threads.

Solid Wood Face Frame Cabinetry that is secured to the wall and ceiling!

We build our own cabinets, and every cabinet is built to the best quality specifications. By building our own cabinets, we can guarantee that they will be made right and are built to last!

Top Quality Materials

All NORTHWOOD cabinets are made with residential quality material and methods. Because we use screws, they hold up better under travel/road conditions.

Face Frame Construction

We use the same construction techniques used in quality residential cabinetry. We assemble hardwood styles with screws on a face frame machine to ensure strong, durable cabinets. The result: Beautiful, quality cabinetry and the best built truck camper!

- Kitchen Counter Extension (850 only)

Standard Construction Features

- Fully welded, thick wall aluminum frame construction
- One-piece corona treated continuous fiberglass
- Hot polyurethane laminated multi-layered substrate walls
- High density block foam insulation
- One-piece, seamless roof membrane
- Insulated compartment access doors
- Radius cornered, locking luggage compartment doors
- Extended cab-over design
- 2-piece steel reinforced bolt-through tie down brackets
- Diamond plate knee wall armor

Standard Heat, Power, & Water Equip.

- Interior command center
- 12V electrical system
- Deluxe 110V 45-amp power converter
- 30-amp park power cord
- 20K BTU auto-ignition furnace
- 110V GFI circuit protected exterior patio outlet
- 12V water pump system
- Hook-up for city water
- 6-gal DSI gas/electric quick recovery water heater
- 1- 20 lb LPG tank w/ regulator
- Durable polyethylene holding tanks
- 33 gal fresh water tank 850 (incl. water heater)
- 33 gal fresh water tank 816 (incl. water heater)

Standard Exterior Features

- LED exterior lighting
- Entry assist handle
- Fiberglass, insulated entry door
- Screen door with kick plate
- Rain gutters with oversized down spouts
- Radius cornered windows with screens
- Dual battery capacity
- Dual LP tank capacity (850 only)
- Park cable TV hook-up with RG6 cable
- Tinted safety glass windows
- Wide view rear window w/cover
- Pre-wired for TV antenna
- Pre-wired for satellite
- Pre-wired for solar panel
- Pre-wired for stereo
- Pre-wired for fantastic fan
- Pre-wired for power jacks
- Truck storage access passage

Standard Bathroom Features

- Hand flush toilet
- Molded full height fiberglass shower stall (850 only)
- Shower curtain with curved track
- Bath skylight
- Exhaust fan in bathroom
- Medicine cabinet w/mirror (850 only)
- Toilet paper holder
- Fold-down clothes hanger

Standard Safety Features

- GFI circuit protection
- Smoke alarm
- LPG leak detector
- Carbon monoxide detector
- Fire extinguisher
- Dead bolt lock on entry door
- Egress window (emergency escape)
